

Turnip

Team 2 - Sprint 3 Planning Document

Abigail Alderson, Cole Johnson, Keegan Irby, Kevin Cardona, Kyle Pollina

Sprint Overview

Unlike either of the previous sprints, the third sprint will focus on deeper functionality over building the platform. A large part of Turnip's goal is to effectively integrate third party applications like Venmo, Spotify, and Google Maps so users can quickly and easily pay hosts, collaborate on music playlists, and navigate to event locations. Along with the user stories listed below, our team plans to continue to improve tasks from the second sprint.

Scrum Master: Abigail Alderson

Meeting Plan: Mondays and Fridays 10:30-11:30 a.m.

Risks and Challenges: As we approach project presentations during the last week of our sprint, we need to stay on top of our weekly tasks to ensure that we are completing user stories on time. It is crucial for strict deadlines to be set and met in order for a functional product to be submitted during the third week. While we don't have as many user stories as normal, the complexity of the ones listed below may prove to be difficult.

Current Sprint Details

User Story #1

As a user, I would like to view content “memory albums” of past events I’ve been involved in.

#	Description	Time	Team	Owner
1	Memory albums tab per each event	5	Front	Cole
2	Generate top posts for each event	10	Back	Keegan
3	Serve text and images	6	Back	Keegan

Acceptance Criteria

- Given that a user is logged in and attended an event, he/she will be able to view all photos he/she is tagged in.
- Given that a user is logged in and attended an event, he/she will be able to “like” posts.

User Story #2

As a host, I would like to allow users to add music to my Spotify playlist.

#	Description	Time	Team	Owner
1	Configure Spotify app page	5	Front	Cole
2	Let users find, select, and vote on songs	10	Front	Gail
3	Set up backend to handle the Spotify API	10	Back	Kyle

Acceptance Criteria

- Given that a user is logged in and invited to an event, he/she will be able to add music to a Spotify playlist specific to that event.

User Story #3

As a host, I would like to set up my payment solution (Venmo, Square) for event entrance.

#	Description	Time	Team	Owner
1	Build host payment configure app page	2	Front	Gail
2	Allow host to set amount and other options	8	Front	Gail
3	Set up the back end to handle the payments API	15	Back	Kevin
4	Route payments to correct recipient and set up payment confirmation	15	Back	Kevin

Acceptance Criteria

- Given that I am a designated host of an event, I can have my guests pay me for event costs using Venmo on the event page.
- Given that I am a designated host of an event, I can request certain amounts of money from my guests.

User Story #4

As a guest, I would like to tag other attendees in content.

#	Description	Time	Team	Owner
1	Build capabilities to look up users and select them	10	Front	Cole
2	Build user lookup	7	Back	Keegan
3	Save user tags	7	Back	Keegan

Acceptance Criteria

- Given that a user and the person he/she is tagging were both invited to the event, that user will be able to successfully look up another person and tag the other in the media.
- Given that a user is invited to an event, he/she will be able to view all tagged persons in a picture/video/etc.

User Story #5

As a guest, I would like to view detailed directions to the event based on where I am located.

#	Description	Time	Team	Owner
1	Configure Google Maps app page	10	Front	Gail
2	Find user's current location and route to event location	10	Back	Kyle

Acceptance Criteria

- Given that a user is invited to an event, he/she will be able to follow directions to a host's address on the map page of an event.

User Story #6

As a guest, I would like to pay host for event entrance.

#	Description	Time	Team	Owner
1	Build user payment page	10	Front	Cole
2	Allow users to pay host	10	Back	Kyle

Acceptance Criteria

- Given that the user is an invited guest, he/she will be able to view a Venmo payment option on the event page that deposits payments into the host's account.

Remaining Backlog

1) As a user, I would like to...

- a) ~~create an account on Turnip.~~
- b) ~~login to my Turnip account.~~
- c) ~~access my account on different devices.~~
- d) ~~change my account information including my name, password, and email.~~
- e) ~~view my profile.~~
- f) ~~view my events feed.~~
- g) ~~upload content to a current event stream.~~
- h) ~~comment and interact with other users on event posts.~~
- i) ~~export content from Turnip to Facebook, Instagram or other platforms.~~
- j) ~~view content "memory albums" of past events I've been involved with.~~
- k) ~~view clear details about events.~~
- l) ~~view other public profiles~~
- m) ~~receive notifications about event updates~~

2) As a host, I would like to...

- a) ~~create an event.~~
- b) ~~invite my friends to my event.~~
- c) ~~edit content on my event's stream.~~
- d) ~~customize my event page to suit my event's theme.~~
- e) ~~allow users to add music to my Spotify playlist.~~
- f) ~~set up my payment solution (Venmo, Square) for event entrance.~~

3) As a guest, I would like to...

- a) ~~RSVP to an event.~~
- b) ~~tag other attendees in content.~~
- c) ~~view detailed directions to the event based on where I am located.~~
- d) ~~pay host for event entrance.~~
